June 18, 2001

Mr. David S. von Broembsen
ChlorKing, Inc.
735 Club Chase Court

Dr. David,

This letter is a follow-up of my personal observation and comments on the ChlorKing Saline Chlorination System installed in January 2001 by your company on the Athens YMCA 125,000 gallon indoor pool.

The benefits of this system go beyond the handling and regulating of chlorine. The response to the new system has been tremendous. Some of the members who have very sensitive skin are now able to swim in the pool for the first time in years. The water is so pure that every member of the family can swim without chlorine irritations. The instructors at the YMCA enjoy the ChlorKing System because it is easier to get the children to put their faces in the water. Let me just say that you made good on your promise that I would be extremely satisfied with the clarity and sparkle of the pool water using the ChlorKing System. This is the "miracle" disinfection system that I have been searching for.

Maintenance of the pool has changed from a time consuming chore, to a very easy process. Prior to installing the system, our pool water had to be balanced daily. We had problems keeping the right amount of chemicals in balance, handling chlorine and taking precautions not to inhale the fumes. Our pool water had to be regularly shocked more times than I care to mention. Additional chemical compounds by the gallons would be added to keep it relatively clear from one day to the next. Algae always appeared and chemicals to prevent algae growth were constantly added. I did not expect relief from the algae problem we experienced. I am pleasantly surprised that algae has not shown up in the time we have been using the ChlorKing System.

I found your staff to be very knowledgeable, professional and sincerely interested in helping me maintain a high quality swimming pool environment for our members, and their efforts are appreciated.

I strongly recommend this system to any pool owner looking for a system that delivers clean and gentle pool water with a minimum of maintenance.

Sincerely,

Mary E. Harris
