Have you been given the project of planning or building a spray park?
Does this task feel overwhelming with options and you don't know where to start?

Let Waterplay Solutions guide you through the process from the first explorative iterations into spray parks through to the grand opening and beyond. Choosing a Waterplay park for your play space is a significant decision, and we provide the assistance you deserve. Our adage is "Dream, Design, Deliver".

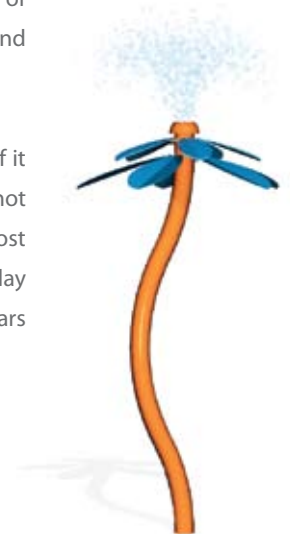

Dream. You have a vision. A vision of a thriving water play area in a park, resort or community center. We know that designing sustainable public spaces to reflect the identity of the community, promote healthy living and stimulate active participation can be a daunting task. Your dreams are big but how does it become a reality? That's where Waterplay Solutions comes in. Let us join your team and realize your dream.

With our creative solution specialists we are able to tailor a park to your specific needs; through the use of custom theming, vast product selection that is truly interactive and innovative park design you will receive optimal play value for your project. No dream is too big for Waterplay Solutions.

Design. Your time is valuable. We want to make your job easier. Whether you are looking to create an enticing urban oasis, an interactive children's water play area or a destination for families to gather together and unwind, look no further. Our online design tools and experienced team of service professionals give you the power to bring your creative visions to life. Waterplay offers the greatest scope of solutions to support the most demanding of designs. Our commitment to excellence shines through in every aspect of our service, support, product design and manufacturing process.

Deliver. You need a partner you can count on. No matter how fabulous the water park design or components, if it doesn't arrive on time and in superior condition – then you are back to square one. But the ability to deliver is not simply about shipping. We feel delivery comes in many forms; whether it's service, quality, safety, warranty and most of all; end-user satisfaction. We know these areas are important to you. Once you have received your Waterplay products on site, our job is not done. Our customer service continues; whether it's one month, 5 years or 25 years after completion. If you have questions or concerns, our Project Support specialists are ready and willing to help.

Service Solutions

PROJECT SUPPORT Building extraordinary relationships

WE GUARANTEE EXCEPTIONAL SERVICE EVERY TIME YOU CALL. YOUR INVESTMENT IS ALSO OURS, AND WE TAKE PRIDE IN QUALITY BUILT PRODUCTS AND PARKS.

Whatever your needs, we offer you peace of mind with practical solutions!

Through the design process and as long as you own your park, the Waterplay Project Support Team will work with you and your chosen team of experts. They will facilitate discussions between the on-site project manager, general contractor, subcontractors, and lead designers to ensure the installation process is seamless. Comprehensive support documents are readily available to assist the contractor with all aspects of water play park construction.

Waterplay's resources reach beyond the water feature installation portion of each project, touching important areas, including but not limited to; footings, surfacing techniques, sub grade preparation, water supply and discharge methods, facility enhancements and ongoing care and attention necessary to keep your investment in top condition. Even years after the park is turned on, our team is here to offer advice that will optimize your parks efficiency and performance with minimal maintenance. Always just a phone call away, our team is well versed in communicating with all experts in the field.

Water play parks are our business, and we understand what is required for flawless design, installation, start-up and maintenance. Our goal... quality, service and fun beyond your expectations.

PROJECT DEVELOPMENT PLANNING

PARTNERS

Get your feet wet with Waterplay at our revolutionary on-line park builder. Visit www.waterplay.com, peruse our site for design ideas, and then click on 'park builder'. There, you will begin the adventure of designing your very own spray park. Starting with your choice of venues, you will then go on to select your components while keeping your budget in check. Once you are satisfied with your component choices and layout, click 'submit', and a Waterplay representative will contact you to further develop your design.

Our sales team will make recommendations based on budget that includes layout, surfacing, installation, and maintenance. The next step is choosing a water source and evaluating space constraints.

With all of this information gathered, you are well on your way to developing a water play space that's brimming with fun.

Choosing your team carefully simplifies the water play park development process. Your working group may consist of an engineer, health authority, architect or landscape architect, and a project manager.

Selecting the companies for design and installation are critical milestones that are best done early. If necessary, we can recommend designers and installers in your area. Count on Waterplay to maximize efficiency and eliminate oversights by coordinating directly with the designer and installer.

With a solid team in place, you can streamline the development process resulting in reduced overall project costs.

DESIGN

www.waterplay.com

INSTALLATION

MAINTENANCE

Now that all the building blocks are in place, developing the layout can begin. The chosen design team will take stock of safety standards, applicable public health regulations, and the unique qualities of the setting. This is where the fun phase of design begins with component choice, color, theme, and park layout.

Spray Park design has never been easier with Waterplay's on-line Design Center. This comprehensive tool offers you and your team access to technical component files, including: 2D CAD blocks, spec pages, and photos. These essential building blocks are ready to easily drop into your design plans any time you need them. Just call us to get your user name and password.

Realize the advantage of convenient access to the latest in spray park technology.

The chosen project manager oversees the water play park installation. This individual, working with a general contractor and our in-house Project Management Team, will lead a team consisting of a pool contractor, electrician, plumber, and concrete sub trade.

The installation process begins with site excavation and pouring the concrete footings for the components. Then, the components are plumbed and the electrician completes the electrical requirements. At this point, the water play park begins to take shape as components are secured to the footings and the area is backfilled. The last step is setting the final grade. Now all that remains is a thorough park test and then you're ready to let the play begin!

Ongoing support is an essential element in maintaining a properly functioning spray park for decades. Waterplay recommends daily site visits prior to opening to ensure the pad is free of debris, and to ensure that the water pressure is at the optimum level. For parks with a treated water system, regular water quality checks must be performed. To keep Waterplay components looking their best, buff and polish them monthly.

Our knowledgeable toll free phone support and navigable web site provides quick responses to questions, technical issues and maintenance requirements. We're here to create the most play value for children, and to give you the most value for your investment.

choose features

to suit your environment

Cool parks need cool play features.

The key to a great water play park is choosing the right features. Whether installing a park to include single features, numerous or custom themes, our designs maximize your space and budget. No matter what your application safe and durable products provide unlimited aesthetic appeal and function.

We offer the largest scope of water play area products from traditional spray features to slides and shade sails; we have a solution for you.

activators

Interactive systems are activated by a child's touch

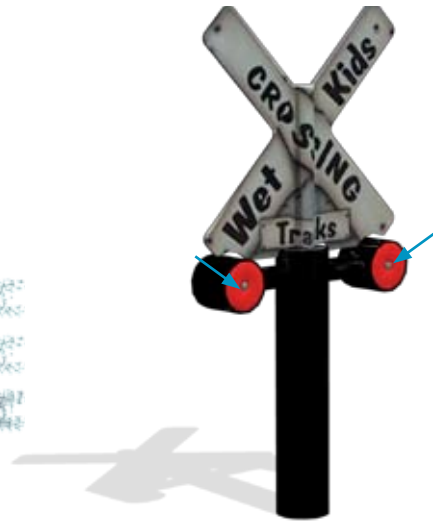

Activators put children in control of their fun, by telling the water where to go and when. Each Waterplay activator has a sensor incorporated into the component. When a child touches the activator, a signal is electronically sent to the control system, bringing the park to life.

spray ground environments

Key features our slides include:

- Multiple slide configurations with 4 and 6 foot/1.2 and 1.8 metre slide heights;
- Play zone variety with dumping buckets and rain showers;
- Sightlines that provide exceptional visibility at all times;
- Compliance with applicable ASTM F1487 CAN/CSA 2614 safety standard;
- Stainless steel structure with super durable, UV resistant powder coated finish;
- Polycarbonate windows;
- Fiberglass slide and deck with anti-slip surface;
- Ease of installation with surface mounting.

shade sails

Our shade sails offer the coolest solution under the sun

There is no better way to protect people and property from harsh conditions such as the sun's ultra-violet rays, heat and glare and reduce water evaporation in pools or spray parks than with our Monotec 370 shadecloth sails.

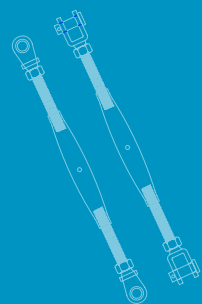

The Monotec 370 shadecloth sets the benchmark for heavy duty commercial grade knitted shadecloth. Suitable for smaller domestic type applications to the largest commercial or architectural projects, this high quality UV stabilized high density polyethylene product is engineered to last. Shade sails greatly increase the use of outdoor spaces at a moderate cost.

Key features of our shade sails include:

- Made from 100% high density polyethylene round yarn;
- UV protection exceeding even the toughest Australian standards;
- 10 year UV warranty;
- 10 year tension warranty;
- Tested for flammability;
- Superior strength;
- Wide rolls, less seams;
- Mildew & mold resistant.
- Available in 14 colours

urban water features

Enrich quality of life through extraordinary spaces

The pace of life can be hectic and urban environments chaotic. Through thoughtful design, you can create spaces that encourage people to gather, communicate, relax and refresh. Architecturally and artistically inspired, our urban water features provide a momentary pause from today's frantic pace of life. They invite children to experience the joy of urban landscapes and they provide a peaceful sanctuary for adults.

Our urban water features provide a transitional design component for your project. You can include them in your spray park to add visual impact and appeal or use them individually as a showcase feature in a shopping centre, city plaza or park. They offer playful water effects by day and evolve to softly flowing water, subtly lit by night

The control system is the heart of a water play park's interactivity. Waterplay's control panels are built with safety, durability, water conservation and of course, unpredictable fun in mind. Our controllers are considered the highest quality in the industry, and are easy to use.

Waterplay control panels feature logical touch pad interfaces with LCD displays, allowing the park operator to set the rules of water use with confidence. Default settings are established with your input to set the days and times of operation, overall water consumption rates, and sequencing patterns. Our team will help you choose the ideal controller for your park.

measurements are a general guide, specific sizes are determined upon final selection of components.

Waterplay's creative juices don't just flow to the design of our components. When it comes to water conservation, we think outside the box. The goal of any water management system is to be as efficient as possible while maintaining water quality. Our water management systems provide three alternatives to your average "drain to waste" system: Water Treatment Systems, Retain and Reuse Systems and Desalination Systems.

Potable Systems – Do not assume that you have to use a treated water system to offset the use of water. Potable systems are not synonymous with wasted water. Depending on local regulations for the treatment of gray water, there are options for water reclamation such as irrigation or to flush public washrooms. Potable systems are perfect for small spaces or tight budgets, and ensure high quality water at all times.

Treated Water Systems – A treated water system (TWS) adheres to public health requirements for spray park facilities while reducing the overall water consumption. Through a system of filtration, disinfection and replenishing, the water's chemical make-up is continually monitored to ensure that safe water is recycled for use in your park. All of the water is collected into a holding tank and sent back through the water treatment system, resulting in minimal water loss and maximum social responsibility.

Custom Solutions

standard color choices

CHOCOLATE BROWN	DEERE GREEN	PURPLE VIOLET	SIGNAL BLUE	WATER BLUE
SUNFLOWER YELLOW	* SUPER CHROME	SULPHUR YELLOW	GLOSS WHITE	GRAY
YELLOW GREEN	SAFETY ORANGE	FIRE RED	HOLLAND BLACK	SKY BLUE
RAILING BEIGE				

Our extensive research has proven that children love bright primary colors. With a vast spectrum of hues, you'll add environmental excitement and sensory stimulation to the children's play experience.

Waterplay strives to lead the industry in innovation, environmentally friendly manufacturing processes and products, and quality. Staying true to that vision, Waterplay uses cutting edge powder coating applications. This super durable paint uses Primid for its hardening agent rather than TGIC, which may be hazardous to people and to the ozone in its raw form. Further, this powder coating product features superior fade resistance, gloss retention, and protection from extreme heat, constant moisture and ultraviolet rays.

The color choices above are reasonable representations of our actual component color options. If your favourite isn't on our palette, we can custom mix colors to satisfy your specific needs.

* available at an additional fee

Our urban metallic colors are available for all features with an additional charge.

theme graphics

DETACHABLE
ALUMINUM PANEL

5" PIPE

9 DELRIN

[1524 mm]

7'-11"
[14 mm]

Waterplay custom graphics are tough. The base coat, and clear top coat applications stand up to extreme weather conditions and are used to create speciality graphics such as stripes, polka dots, and many other unique creations.

Local, cultural, historical and geographical influences can capture a theme in a water play park. Choose a medieval castle complete with a colorful serpent, create a desert island with palm trees and whales or recreate an old time railway station with a kidz x-ing activator and a water tower. If you can dream it, we can create it.

Our professional artists are kids at heart and their custom splashes of color are always fun and appealing to children and adults alike. When asked which graphics young children prefer, the overwhelming response is those with simplistic designs. Conversely, older children are drawn to complex creations. Our sales and design team will work with you in developing age appropriate spaces to optimize your custom theme components.

Think like a kid and develop a theme for hours of fun and imaginative play.

Accessories

nozzles & custom signs

Customized water effects for optimal play value

NOZZLES

Nozzles – the interface between toys & children.

Waterplay designs components to include as many as 40% more nozzles than our competitors. We have spent considerable resources on developing a line of nozzles that feature custom spray patterns for maximum play value and specific site requirements. Our nozzles are available in Enviro Flow, specifically designed for low water consumption parks, and Max Flow, designed for treated water systems and high water consumption environments. Waterplay nozzles are installed flush on all components and at final grade so that there are no pinch points.

Our dedicated R&D team recommends Delrin® nozzles. Over time, brass nozzles tend to meld with dissimilar metals making servicing difficult. Delrin® bridges the gap between metals and ordinary plastics with a unique combination of strength, toughness, fatigue resistance, abrasion resistance, low wear and low friction. The bottom line is better performance and a long lasting product for everyone's enjoyment.

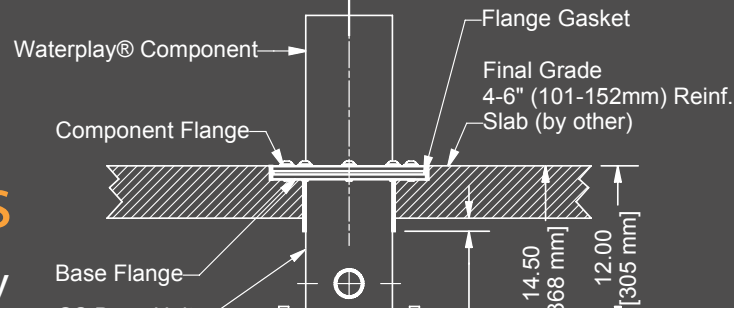

CUSTOM SIGNS

Carry your unique theme throughout the park with Waterplay signs designed specifically for you.

w w w . w a t e r p l a y . c o m

DEXTM & drains

Presenting versatility

DEXTM: DETACH & EXCHANGE

Waterplay's revolutionary anchoring system, the Detach and Exchange System, or DEX System, increases usage opportunities for water play park surfaces.

Traditionally, upright spray park components were bolted to footings and then further cemented into place, limiting use of spray pads during winter months. With the DEX System, above grade components can now be easily removed making way for winter activities. Additionally, park owners can purchase new components for refreshing water play experiences year after year.

DRAINS

Every spray park should have a couple of drains to ensure safe operation so why not complete your park with Waterplay drains. Available in green, black, gray and sandstone, these drains will fit seamlessly into your park design.

Quality & Safety

we take fun seriously

We are committed to offering the best.

Built with the best materials and to the highest standards, our products are tough. Our personal pride and manufacturing confidence are backed by a twenty-five year warranty on the structural integrity of all stainless steel alloys that guarantees them to be free of defect, corrosion and deterioration. All control systems, parts and accessories, including even the smallest structural pieces and fasteners, are warranted for two full years. Full specifications are outlined in our warranty. For added piece of mind, ask us about our optional extended warranty packages.

We care about kids. That is why our designs meet or exceed the strictest safety standards, and they are created so that children of all abilities can play. Installers and owners can build without worry, and parents and care takers can let the children play without hesitation.

All children deserve to stay cool on hot days. Activator contact points are low to accommodate all heights, the archie and loop bases are wide enough to easily cruise through in a wheel chair.

Key to our success and true to our philosophy, safety is paramount to all Waterplay innovations. Thick and tall features prevent grasping and climbing, and flush nozzles provide entrapment free, interactive play. Flow rates, surface slope and drainage are important considerations and are designed specifically to maximize park safety.

With a Waterplay park, "no worries" means imaginations are set free to run wild.
