

Product Features

- Conventional pools can be promptly converted to multi-purpose facilities
- Provides for competitive swimming at various lengths
- Flow-thru design enhances fastest wave quelling effect
- Variable buoyancy features assures maximum stability and easy operation
- Custom engineered to reduce deflection, bowing or bounce
- Designed to incorporate all types of competitive timing equipment
- Field erected and installed by factory-authorized technicians
- Complete 5-year warranty covering workmanship, materials and performance
- Complies with all competitive rules and regulatory authorities

Construction Details

- Factory fabricated low carbon stainless steel truss frame
- Stainless steel exposed surface
- Corrosion resistant pultruded anti-skid fiberglass grating
- Built in lane line and starting platform anchors
- Stainless steel ballast tank with filling vents and relief valves
- Includes racing lane targets
- Locking pins for precise course length location
